HiMedia Laboratories ties up with Syngene to manufacture ELISA test kits for COVID – 19 under the brand name ELISafe 19

Mumbai, India; June 05, 2020:

HiMedia Laboratories Pvt Ltd., a bioscience company with expertise in media manufacturing and diagnostics for over 45 years having presence over 150 countries, has partnered with Syngene International Ltd., an integrated research and development services company. HiMedia will manufacture the ELISA kits developed by Syngene at its facilities in Mumbai and will distribute it across the country.

Syngene has indigenously developed an anti-COVID-2 IgG ELISA (Enzyme-Linked Immunosorbent Assay) at its research facility in Bengaluru. This advanced highly reliable test identifies the presence of SARS-COV-2 antibodies in blood samples and confirms if a patient has been exposed to the coronavirus. It has a capacity to test samples together in a single run and generates results within 3 hours.

Commenting on the collaboration, Dr Mahesh Bhalgat, Chief Operating Officer, Syngene International Ltd., said, “At a time when the number of COVID-19 cases is increasing at an alarming rate across the country, there is an urgent need to make available reliable testing kits using advanced technology to test patients and identify positive cases. To fill this gap, Syngene, with its expertise across diverse scientific domains, has developed an ELISA kit that allows higher throughput and generates faster results. We are happy to tie-up with HiMedia who will make the kits available at a large scale to significantly increase serological testing in India.”

Dr. Vishal G. Warke, Director R&D, Cell Culture and Immunology, HiMedia Laboratories added, “We are happy to partner with Syngene in manufacturing and distributing their ELISA kits. This partnership brings together our mutual expertise in research and manufacturing and will further strengthen our fight against the COVID19 pandemic.”

As part of the collaboration, Syngene will initiate tech-transfer of the kits to HiMedia for developing the prototypes for submission to CDSCO for approval. HiMedia will launch the kits in two weeks after receiving the approval and market it under its brand name ELISafe 19.

About HiMedia

HiMedia Laboratories Pvt. Ltd. is a leading Bioscience Company of Indian origin, having expertise in innovation, and manufacturing of Microbiology, Cell Culture and Plant tissue Culture media, Molecular Biology, Diagnostics, Chemicals, Laboratory Equipments, and Hydroponics Solutions. The principal mission behind the establishment of the organization, four decades ago, was to help Indian scientific fraternity by providing world class quality products at competitive prices. With presence in over 150 countries, HiMedia ranks amongst top 3 Media Manufacturers in the world. Since Research and Development is the core foundation of HiMedia, the brand invests significant amount of its profits in R&D and is driven
by a strong team of scientists and experts. Himedia’s state-of-the-art manufacturing units are spread over 8 locations. Visit www.himedialabs.com for more details.
