Principle and Interpretation :

Complete Supplement Mixture w/o LEU-URA is used as a dropout supplement for all strains of *Saccharomyces cerevisiae*. Complete Supplement Mixture (CSM) is composed of all the amino acids required for the vigorous growth of *Saccharomyces cerevisiae*. It also contains uracil. CSM w/o LEU-URA does not contain leucine and uracil. This makes it a double dropout growth medium for yeast cells. It can be mixed with yeast nitrogen base (YNB), ammonium sulphate and an appropriate carbon source (glucose/galactose/raffinose). A leucine and uracil auxotrophic yeast mutant strain cannot grow on this media but a wild-type or a leucine and uracil prototrophic yeast strain can grow.
