#### **Bold Basal Solution (10X)**

### PL031

#### **Composition :**

| Ingredients                          | milligrams/100ml |
|--------------------------------------|------------------|
| Sodium nitrate                       | 250.000          |
| Calcium EDTA                         | 63.600           |
| Magnesium sulphate heptahydrate      | 75.000           |
| Potassium dihydrogen phosphate       | 233.600          |
| Sodium chloride                      | 25.000           |
| EDTA                                 | 50.000           |
| Ferric EDTA monosodium salt          | 6.500            |
| Boric acid                           | 11.400           |
| Zinc sulphate.7H <sub>2</sub> O      | 8.800            |
| Manganese chloride.4H <sub>2</sub> O | 1.400            |
| Molybdenum trioxide                  | 0.700            |
| Copper sulphate.5H <sub>2</sub> O    | 1.600            |
| Cobalt nitrate.6H <sub>2</sub> O     | 0.500            |
| Tris free base                       | 12.500           |

#### TOTAL gm/100ml

0.74

#### **Directions :**

Measure out approximately 600ml of distilled water. While stirring add 100ml of basal stock solution. Rinse the original bottle with a small volume of distilled water to remove traces of the solution. Add desired heat stable supplements prior to autoclaving. Adjust the medium to the desired pH using 1N HCl/1N NaOH. Make up the final volume to 1000ml with distilled water. Sterilize the medium by autoclaving at 15 lbs or 121°C for 15 minutes. Cool the autoclaved medium to 45°C before adding the filter sterilized heat labile supplements. Dispense the desired amount of medium in sterile culture vessels.

#### **Principle and Interpretation :**

Bold basal solution (10X) is a filter sterilized liquid. Recommended for the *in vitro* cultivation of fresh water algae. Add 100ml per litre of basal stock solution to the prepared medium to achieve the desired concentration.

#### **Quality Control:**

| Appearance | : Colourless to yellow, clear solution.                   |
|------------|---|
| pН         | : $4.8 \pm 1.0$ of 100ml basal stock solution.            |
| Sterility  | : No bacterial or fungal growth is observed after 14 days |
|            | of incubation, as per USP specification.                  |

#### **Cultural Response:**

Cultural condition :

| <ul> <li>Incubation p</li> <li>Temperature</li> <li>Photoperiod</li> </ul> | eriod<br>(D: N) in hours | : 8 weeks<br>: 24°C ±1.0°C<br>: 24.0              |  |
|--|--------------------------|---|--|
| Cell Line  | Type of Culture          | Results   |  |
| Chlorella species  | Suspension cultur        | e Actively growing cells,<br>No toxicity to cells |  |
| Nostoc species   | Suspension cultur        | e Actively growing cells,<br>No toxicity to cells |  |
|  |                          |   |  |

[The medium is prepared as per direction. The growth promoting activity of this basal salt solution is evaluated using two algal species viz. *Chlorella* species and *Nostoc* species through three passages.]

#### **Storage and shelf life :**

Store the basal stock solution at 2-8°C away from direct light. If possible, the entire content of each bottle should be used immediately aseptically after opening or else the unused portion should be stored at the given temperature. Avoid contaminating the liquid. Use before the expiry date.
