

# **Technical Data**

Chée & Pool (C2D) Vitis Medium w/ Vitamins; w/o Sucrose and Agar PT027

## **Composition:**

Ingredients	milligrams/litre
Potassium nitrate	1900.00
Ammonium nitrate	1650.00
Calcium nitrate	492.30
Magnesium sulphate	180.69
Potassium phosphate monobasic	170.00
Manganese sulphate.H <sub>2</sub> O	0.84
Boric acid	6.20
Molybdic acid (sodium salt).2H <sub>2</sub> O	0.25
Zinc sulphate.7H <sub>2</sub> O	8.60
Copper sulphate.5H <sub>2</sub> O	0.025
Cobalt chloride.6H <sub>2</sub> O	0.025
Ferrous sulphate.7H <sub>2</sub> O	27.80
EDTA disodium salt.2H <sub>2</sub> O	37.30
myo - Inositol	10.00
Thiamine hydrochloride	1.00
Pyridoxine hydrochloride	1.00
Nicotinic acid (Free acid)	1.00
TOTAL gm/litre	4.49

### **Directions:**

Suspend 4.47 grams of dehydrated medium<sup>#</sup> in 600ml of distilled water and rinse media vial with small quantity of distilled water to remove traces of powder. Apply constant gentle stirring to the solution till the powder dissolves completely. Add desired heat stable supplements prior to autoclaving. Adjust the medium to the desired pH using 1N HCl/NaOH. Make up the final volume to 1000ml with distilled water. Sterilize the medium by autoclaving at 15 lbs or 121°C for 15 minutes. Cool the autoclaved medium to 45°C before adding the filter sterilized heat labile supplements. Dispense the desired amount of medium aseptically in sterile culture vessels.

<sup>#</sup> Weight after vacuum drying to remove all water

#### **Principle and Interpretation:**

Chée and Pool (C2D) Vitis medium has been specially formulated for plant cell, tissue and organ cultures. Ammonium nitrate and potassium nitrate serves as the sources of nitrate. Medium does not contain sucrose and agar; hence these components have to be added to the medium before use.

#### **Quality Control:**

Appearance : White to off-white, homogeneous, free flowing powder.

Solubility : 4.47 gm/litre soluble in distilled water. Colour and Clarity : Colourless to light yellow, clear solution. pH at  $25^{\circ}$ C :  $4.0 \pm 0.5$  of 0.447% w/v dehydrated medium.

## **Cultural Response:**

#### Cultural condition:

• Incubation period : 5 weeks • Relative humidity :  $60\% \pm 2\%$ • Temperature :  $22^{\circ}\text{C} \pm 2^{\circ}\text{C}$ • Photoperiod (D:N) in hours : 16:8

Cell Line	Type of Culture	Results
Musa species	Shoot culture	No structural deformity observed
		No necrotic tissues,
		Actively growing shoots,
		No toxicity to shoots
Daucus species	Callus culture	No necrotic tissues,
		Actively growing callus,
		No toxicity to callus

[The medium is prepared as per direction. The growth promoting activity of this plant tissue culture medium is evaluated using two plant species viz. *Musa* species and *Daucus* species through three passages. Plant growth hormones (e.g. 2,4-D, NAA, Kinetin and 6-BAP) are added in suitable combinations and concentrations.]

### **Storage and shelf life:**

Dehydrated plant tissue culture media powder is extremely hygroscopic and should be protected from atmospheric moisture. If possible, the entire content of each bottle should be used immediately after opening or else the unused portion should be stored in a desiccator and refrigerated at 2-8°C. Use before the expiry date.
