Tryptone, Type-II (Casitose, Type II) RM028

Intended use

Tryptone, Type-II (Casitose, Type II) is carefully manufactured under controlled conditions of enzyme hydrolysis using high quality lactose free milk protein and is equivalent to Casitone and is specially used in Antibiotic Assay Media. And is ideal in culture media wherein microbial growth is determined by optical means. Also it is a very rich source of Amino Nitrogen.

Warning and Precautions

Read the label before opening the container. Wear protective gloves/protective clothing/eye protection/ face protection. Follow good microbiological lab practices while handling specimens and culture. Safety guidelines may be referred in individual safety data sheets.

Limitations

1.It is biological origin product since variation in colour of powder and clarity may observed.
2.Each lot of the product has been tested for the organisms specified on the COA. It is recommended to users to validate the medium for any specific microorganism other than mentioned in the COA based on the user's requirement.
3.Individual organisms differ in their growth requirement and may show variable growth patterns on the medium prepared by the product.

Performance and Evaluation

Performance of the medium is expected when used as per the direction on the label within the expiry period when stored at recommended temperature

Quality Control

- **Appearance :** Off white to light yellow homogenous free flowing powder characteristic odour but not putrescent
- **Solubility :** Freely soluble in distilled/purified water, insoluble in alcohol and ether.
- **Clarity :** 1% w/v aqueous solution is clear without any haziness after autoclaving at 15 lbs pressure (121ºC) for 15 minutes.
- **pH :** pH of 2% w/v aqueous solution at 25ºC 6.2 - 7.2
- **Microbial Load :**

  Bacterial Count : <= 2000 CFU/gram by plate method, when incubated at 30-35ºC for not less than 3 days
  Yeast & mould Count : <= 100 CFU/gram by plate method, when incubated at 20-25ºC for not less than 5 days.
- **Test for pathogens :** 1. *Escherichia coli*- Absent/gram of sample 2. *Salmonella* species- Absent/10 gram of sample 3. *Pseudomonas aeruginosa*- Absent/gram of sample 4. *Staphylococcus aureus*- Absent/gram of sample 5. *Candida albicans*- Absent/gram of sample 6. *Clostridia*- Absent/gram of sample

.

- **Indole Test :** Tryptophan content: Passes
- **Cultural response :** Cultural response observed after an incubation for bacterial at 35-37ºC for 18-24 hours and for fungal at 20-25°C for not less than 5 days by preparing Soyabean Casein Digest Medium (M011) using Tryptone Type-II (Casitose, Type-II) as an ingredient.

Cultural Response

Organism	Growth
Staphylococcus aureus subsp. *aureus* ATCC 25923 (WDCM 00034)	Luxuriant
Staphylococcus aureus subsp. *aureus* ATCC 6538 (WDCM 00032)	Luxuriant
Escherichia coli ATCC 25922 (WDCM 00013)	Luxuriant
Escherichia coli ATCC 8739 (WDCM 00012)	Luxuriant
Pseudomonas aeruginosa ATCC 27853 (WDCM 00025)	Luxuriant
Pseudomonas aeruginosa ATCC 9027 (WDCM 00026)	Luxuriant
Bacillus subtilis subsp. *Spizizenii* ATCC 6633 (WDCM 00003)	Luxuriant
Salmonella enterica subsp. *enterica* Typhimurium ATCC 14028(WDCM 00031)	Luxuriant
Salmonella enterica subsp.*enterica serotype* Abony NCTC 6017(WDCM 00029)	Luxuriant
Kocuria rhizophila ATCC 9341	Luxuriant
Streptococcus pneumoniae ATCC 6303	Luxuriant
Candida albicans ATCC 10231 (WDCM 00054)	Luxuriant
Aspergillus brasiliensis ATCC 16404 (WDCM 00053)	Luxuriant

Chemical Analysis :

Total Nitrogen : ≥12.00 %

Amino Nitrogen : ≥3.20 %

Sodium chloride : ≤5.00 %

Loss on drying : ≤5.00 %

Residue on ignition : ≤15.00 %

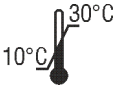
Storage and Shelf Life

Store between 10-30°C in tightly closed container and away from bright light. Use before expiry date on label. On opening, product should be properly stored in dry ventilated area protected from extremes of temperature and sources of ignition. Seal the container tightly after use.

Disposal

.

User must ensure safe disposal by autoclaving and/or incineration of used or unusable preparations of this product. Follow established laboratory procedures in disposing of infectious materials and material that comes into contact with clinical sample must be decontaminated and disposed of in accordance with current laboratory techniques.



Storage temperature

Do not use if package is damaged
